Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-9 and 17, drawn to an antibody or polypeptide capable of binding a human NOGO or NiG polypeptide.
- II. Claims 10-14, drawn to a polynucleotide encoding a polypeptide capable of binding a human NOGO or NiG polypeptide, and an expression system.
- III. Claims 15, 16 and 18, drawn to the use of a binding molecule for human NOGO or NiG polypeptide as a pharmaceutical.

Species Election

This application contains claims directed to the following patentably distinct species of the claimed Inventive Groups I-III. When applicant selects any Inventive Group (above), one species from the list below must be selected to be considered responsive:

1) Species of NOGO or NiG polypeptide:

- a) SEQ ID NO: 5,
- b) SEQ ID NO: 7,
- c) SEQ ID NO: 24,
- d) SEQ ID NO: 6.

The Inventions listed as Inventions I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The binding molecules of NOGO or NiG are all structurally and functionally different chemical compounds, each of which can be made and used without the other compounds. Lack of unity is shown because these compounds lack a common utility.

In addition, the use of a binding molecule for human NOGO or NiG polypeptide as a pharmaceutical requires administration of different compounds which are structurally and functionally different from each other and which can be made and used without the other. Lack of unity is shown because these methods and compounds lack a common utility and lack a common structural feature identified as a basis for a common utility.

In response to this Office Action/Election requirement, applicants must elect from Groups I-III and must elect a species of NOGO or NiG. Applicant is advised that in order for the reply to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. 1.143).

Rejoinder under Ochiai/Brouwer

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See “Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b),” 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the

Art Unit: 1647

product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
